

# Annis Water Resources Institute - GVSU

Muskegon, MI

Grand Valley State University's Annis Water Resources Institute is located on the shoreline of Muskegon Lake, which connects to Lake Michigan. The mission of AWRI is to integrate research, education, and outreach to preserve and enhance freshwater resources. Our research is focused on finding solutions to the most pressing problems facing aquatic resources. The information services center uses geospatial technology and watershed planning tools to educate decision makers. The education program uses the research vessels to provide experiential educational opportunities, with over 160,000 passengers to date being served on these cruises.

## Strategic Programs

### Research Program

Ecosystem restoration, invasive species, climate change, aquatic toxicology, eutrophication, microbial ecology, molecular ecology, and ecosystem modeling

### Information Services Center

Geospatial technology, watershed management and planning, outreach tools

### Vessel and Education Program

Classroom and vessel educational programs

### Graduate Program

MS degree in Biology with emphasis in water resources

## Key Facilities

Lake Michigan Center

R. B. Annis Field Station

RV W.G. Jackson, RV D.J. Angus

Vessel and Education Program
